HTML Page Creation Activity

COM 343
Dr. Alison Witte

ASSIGNMENT

In this project, you will create a single web page, using HTML that you write yourself. Your webpage should be a profile of yourself and include things you like or are interested in. It can include hobbies, favorite movies, personal thoughts, etc. Since these are live on the Internet, please do not include any personal information you would not want others seeing.

FORMAT

The page should be written in Notepad or TextEdit and saved as an .html file, following the instructions in the HTML lecture. The page must contain the following:

- A title tag to name your page
- 3 links
- 1 table
- 3 images
- At least 2 embedded pieces of outside media (videos, audios, etc.)

You must also use at least 5 of the tags from the HTML Elements Refences list on Moodle. These tags can be combined with the elements above. For example, you could use to bold words in your table.

Your goal is to help me get to know you, so you also need to think about organization of the content on the page and about aesthetics. The page should reflect your personality and tastes, but also be easy to see, read, and understand.

IMPORTANT DATES

- Saturday 3/31 (Midnight) Completed HTML file due (Moodle)

ASSESSMENT

The rubric below will be used to this project when it is submitted for grading.

	Organization & Purpose	Presentation & Functionality	Requirements
An A Project (90-100 points)	• Clearly conveys why particular topics have been included in this profile • Is organized by topic • Selects appropriate HTML elements to display various types of content	• Consistently uses aesthetically pleasing design choices • Consistently uses design choices to facilitate user experience • All components of the page function correctly • Is relatively free of minor grammar and spelling errors and contains no major errors	• Includes the required components
A B Project (80-89 points)	• Mostly clearly conveys why particular topics have been included in this profile • Is organized by topic • Mostly selects appropriate HTML elements to display various types of content, with a few questionable choices	• Mostly consistently uses aesthetically pleasing design choices • Mostly consistently uses design choices to facilitate user experience • Most components of the page function correctly, with only one or two minor issues • Contains a few minor grammar and spelling errors and contains no major errors	• Includes the required components
A C Project (70-79 points)	• Generally clearly conveys why particular topics have been included in this profile • Is generally organized by topic, but some information seems out of place • Generally selects appropriate HTML elements to display various types of content, with some questionable choices	• Generally consistently uses aesthetically pleasing design choices • Generally consistently uses design choices to facilitate user experience • A majority of components of the page function correctly, with some noticeable issues • Has some minor grammar and spelling errors and a few major errors	• Includes the required components
A D Project (60-69 points)	• Somewhat clearly conveys why particular topics have been included in this profile • Is somewhat organized by topic, but much information seems out of place • Somewhat selects appropriate HTML elements to display various types of content, with many questionable choices	• Somewhat consistently uses aesthetically pleasing design choices • Somewhat consistently uses design choices to facilitate user experience • Some of components of the page function correctly, with some noticeable issues • Has some minor and several major grammar and spelling errors	• Includes most of the required components, but one is missing
An F Project (Less than 60 points)	• Minimally or never clearly conveys why particular topics have been included in this profile • Is minimally organized by topic, but most information seems out of place • Minimally or never selects appropriate HTML elements to display various types of content, with numerous questionable choices	• Minimally or never uses aesthetically pleasing design choices • Minimally or never uses design choices to facilitate user experience • A few of components of the page function correctly, with numerous noticeable issues • Has many minor and several major grammar and spelling errors	• Includes some of the required components, but more than one is missing
